

A few tips from EGO Paris to look after your furniture properly

Saline environments are corrosive and even very high quality materials suffer from these conditions if they are not properly maintained. Thus **we recommend you to rinse** your furniture regularly in order to remove salt deposits. We also advise you **to cover them** and **to store them inside** when you are not using them.

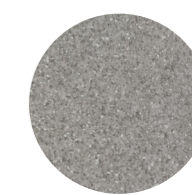

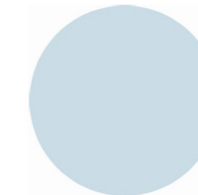

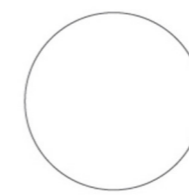

We propose protective covers for your EGO Paris furniture. We do not recommend the use of protection covers that are not supplied by EGO Paris and we decline all responsibility in case of damages that might be caused by their use.

We draw your attention to the risks incurred by application of chemicals, the active principles whose have not been validated by the manufacturer.

We recommend that you do not leave dirt or objects on your furniture for more than 24 hours in order to avoid to stain their surfaces. **Combination-related tasks: moisture retention moisture and heat** not declared at the time of will **not be covered by the guarantee.**

Changes in the appearance of the wood due to ageing are not covered by the warranty. Ageing is not covered. As wood is a living material, its condition changes. As wood is a living material, its condition changes.

Extreme care must be paid when unpacking your furniture to prevent damaging it. Cutter strokes, staple scratches and scratches on table tops placed on the floor are not covered by the guarantee. No guarantees apply if the furniture has been disassembled.

	Lacquered aluminium	Teak	Corian®	Glass	Ceramic
Technical specifications	Thermo-coated aluminium with polyester powder of architectural quality (Alestia by Axalta). Excellent UV and weather resistance. Standard profiles are 2mm thick.	Naturally rot-proof, treated wood.	Solid, non-porous and homogeneous surfacing materials made of acrylic resin and natural minerals. In normal conditions of use, Corian® is wear, shock and scratch resistant.	The table tops are made of 6mm Sécurité tempered glass.	100% mineral ultracompact surface made by blend raw materials used to produce glass and porcelain. Non porous material. UV, frost, shock and scratch resistant.
Maintenance conditions/ regular cleaning	Regularly cleanse the lacquered aluminium parts, at least every 6 months, and more frequently in saline and commercial environments. Wash with soapy water, rinse, then wipe with a soft cloth.	Nourish furniture regularly with specific oils to slow down the darkening process.	Cleanse with soapy water, rinse, then wipe with a soft cloth.	Cleanse with soapy water, rinse, then wipe with a soft cloth. Clean the silicone seals with bathroom cleaning products.	Cleanse with soapy water, rinse, then wipe with a soft cloth.
Maintenance conditions/ stubborn stains	Use specialised cleaning products for lacquered surfaces (for outdoor furniture or cars). In event of scratches on paint, EGO Paris can provide you touch-up kits to prevent the spread of the corrosion.	EGO Paris recommends you to use Starbrite products www.starbrite.com	Refer to the specific instructions on the website www.dupontdenemours.fr	Refer to the specific instructions on the website www.saintgobain-vitrage.fr	https://www.inalco.global/fr
